

# **Environmental, Social & Governance**

## **Annual Sustainability Report 2024**

**Building a Sustainable Future Together**

Published: February 09, 2026

# Executive Summary

This comprehensive ESG report presents our environmental, social, and governance performance for fiscal year 2024. Our commitment to sustainability drives innovation across all business operations, from reducing greenhouse gas emissions to fostering an inclusive workplace culture. This report follows international reporting frameworks including GRI, SASB, and TCFD recommendations.

## Quarterly Financial Performance

| Metric                | Q1 2024 | Q2 2024 | Q3 2024 | Q4 2024 |
|-----------------------|---------|---------|---------|---------|
| Revenue (USD Million) | 425.3   | 467.8   | 512.4   | 589.2   |
| EBITDA Margin (%)     | 18.5    | 19.2    | 20.1    | 21.3    |
| Net Profit Margin (%) | 12.3    | 13.1    | 14.5    | 15.8    |
| Return on Assets (%)  | 8.7     | 9.2     | 9.8     | 10.5    |
| Debt-to-Equity Ratio  | 0.45    | 0.42    | 0.38    | 0.35    |

Our financial performance remained robust throughout 2024, enabling continued investment in sustainability initiatives and stakeholder value creation.

## Environmental Performance

Our environmental strategy focuses on climate action, resource efficiency, and ecosystem protection. We track key metrics across emissions, energy, water, waste, and biodiversity to measure progress toward our 2030 sustainability goals.

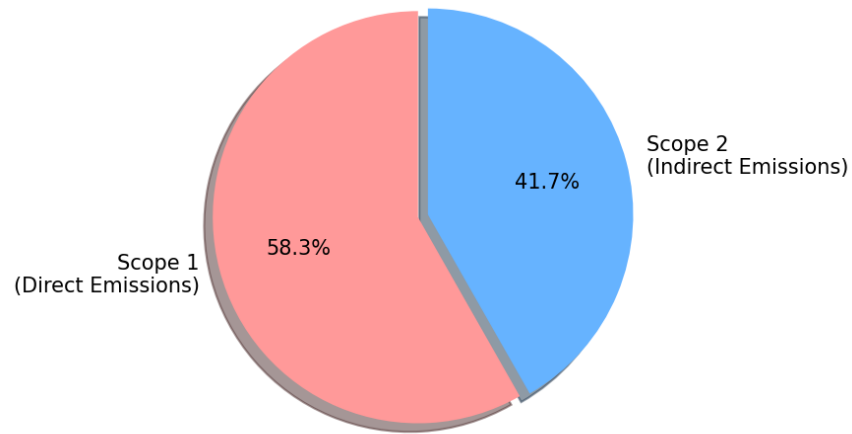

### Greenhouse Gas Emissions

| Field           | Value                                                                               |
|-----------------|-------------------------------------------------------------------------------------|
| ID              | ESG-001                                                                             |
| Aspect          | A1. Emissions                                                                       |
| KPI             | Total greenhouse gas emissions (Scope 1 and Scope 2) and intensity                  |
| Topics          | Scope 1, Scope 2, Total GHG                                                         |
| Quantity Type   | Absolute Values                                                                     |
| Search Terms    | greenhouse gas, GHG, scope 1, scope 2, CO2e, emissions intensity                    |
| Knowledge/Notes | Total GHG emissions in tCO2e; intensity often normalized per revenue or production. |

| Field           | Value                                                             |
|-----------------|-------------------------------------------------------------------|
| ID              | ESG-002                                                           |
| Aspect          | A1. Emissions                                                     |
| KPI             | Direct (Scope 1) greenhouse gas emissions (tonnes CO2e)           |
| Topics          | Scope 1                                                           |
| Quantity Type   | Absolute Values                                                   |
| Search Terms    | scope 1, direct emissions, onsite combustion, stationary fuel     |
| Knowledge/Notes | Scope 1 refers to direct emissions from owned/controlled sources. |

| Field           | Value                                                                               |
|-----------------|-------------------------------------------------------------------------------------|
| ID              | ESG-003                                                                             |
| Aspect          | A1. Emissions                                                                       |
| KPI             | Indirect (Scope 2) greenhouse gas emissions (tonnes CO2e)                           |
| Topics          | Scope 2                                                                             |
| Quantity Type   | Absolute Values                                                                     |
| Search Terms    | scope 2, indirect emissions, purchased electricity, market-based, location-based    |
| Knowledge/Notes | Scope 2 covers indirect emissions from purchased energy (electricity, heat, steam). |

### GHG Emissions by Scope (tCO<sub>2</sub>e)

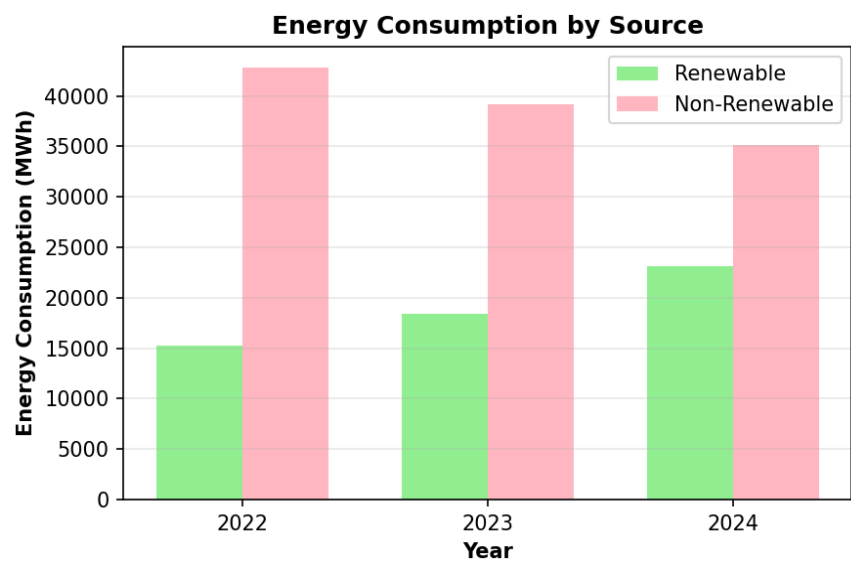

Total emissions for 2024 reached 21,370 tCO<sub>2</sub>e, representing a 12% reduction from our 2023 baseline. Our decarbonization roadmap targets net-zero by 2040.

## Energy Consumption and Renewable Energy

| Field           | Value                                                                                              |
|-----------------|----------------------------------------------------------------------------------------------------|
| ID              | ESG-004                                                                                            |
| Aspect          | A2. Resource Use                                                                                   |
| KPI             | Total energy consumption (MWh) and intensity                                                       |
| Topics          | Energy consumption, energy intensity                                                               |
| Quantity Type   | Absolute Values                                                                                    |
| Search Terms    | energy consumption, kWh, MWh, energy intensity                                                     |
| Knowledge/Notes | Energy consumption includes electricity and fuel for operations; intensity normalizes per output o |

| Field           | Value                                                                             |
|-----------------|-----------------------------------------------------------------------------------|
| ID              | ESG-005                                                                           |
| Aspect          | A2. Resource Use                                                                  |
| KPI             | Share/amount of energy from renewable sources                                     |
| Topics          | Renewable energy                                                                  |
| Quantity Type   | Absolute Values / Share                                                           |
| Search Terms    | renewable energy, on-site renewables, renewable electricity, green power purchase |
| Knowledge/Notes | Percent or absolute energy from renewable sources (solar, wind, hydro, biomass).  |

Renewable energy now represents 40% of our total energy consumption, up from 27% in 2022. We continue investing in on-site solar installations and power purchase agreements for wind energy.

## Information Technology Infrastructure Metrics

| Metric                     | 2022  | 2023  | 2024  |
|----------------------------|-------|-------|-------|
| Server Uptime (%)          | 99.2  | 99.5  | 99.7  |
| Average Response Time (ms) | 245   | 198   | 175   |
| Support Tickets Resolved   | 8,542 | 9,123 | 9,876 |
| Cloud Storage (TB)         | 1,250 | 1,580 | 2,100 |
| Software Licenses          | 5,420 | 6,050 | 6,780 |

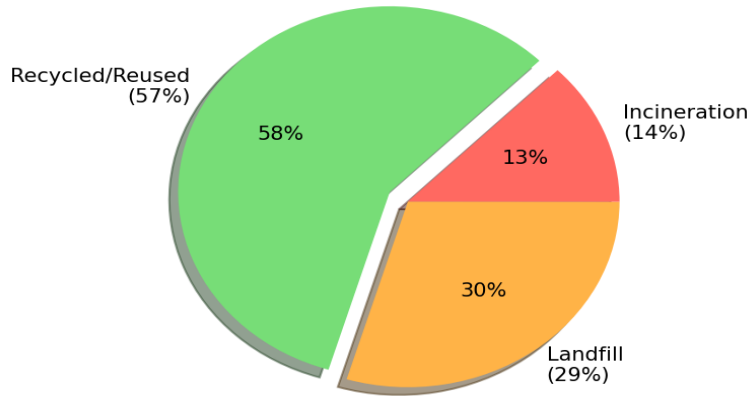

## Water Management and Waste Reduction

| Field                  | Value                                                                                       |
|------------------------|---------------------------------------------------------------------------------------------|
| <b>ID</b>              | ESG-006                                                                                     |
| <b>Aspect</b>          | A2. Resource Use                                                                            |
| <b>KPI</b>             | Total water consumption (m3) and intensity                                                  |
| <b>Topics</b>          | Water consumption, water intensity                                                          |
| <b>Quantity Type</b>   | Absolute Values                                                                             |
| <b>Search Terms</b>    | water consumption, water withdrawal, m3, water intensity                                    |
| <b>Knowledge/Notes</b> | Water consumption reported in cubic meters; intensity often per unit production or revenue. |

| Field                  | Value                                                                                      |
|------------------------|--------------------------------------------------------------------------------------------|
| <b>ID</b>              | ESG-007                                                                                    |
| <b>Aspect</b>          | A1. Emissions                                                                              |
| <b>KPI</b>             | Total hazardous waste produced (tonnes)                                                    |
| <b>Topics</b>          | Hazardous waste                                                                            |
| <b>Quantity Type</b>   | Absolute Values                                                                            |
| <b>Search Terms</b>    | hazardous waste, toxic waste, hazardous materials, waste tonnage                           |
| <b>Knowledge/Notes</b> | Hazardous waste includes electronic, chemical, or toxic wastes requiring special handling. |

| Field                  | Value                                                                                         |
|------------------------|-----------------------------------------------------------------------------------------------|
| <b>ID</b>              | ESG-008                                                                                       |
| <b>Aspect</b>          | A1. Emissions                                                                                 |
| <b>KPI</b>             | Total non-hazardous waste produced (tonnes)                                                   |
| <b>Topics</b>          | Non-hazardous waste                                                                           |
| <b>Quantity Type</b>   | Absolute Values                                                                               |
| <b>Search Terms</b>    | non-hazardous waste, general waste, construction waste, recyclable waste                      |
| <b>Knowledge/Notes</b> | Non-hazardous waste includes common solid waste streams like paper, plastic, and construction |

### Waste Management Distribution (tonnes)

| Field           | Value                                                                     |
|-----------------|---------------------------------------------------------------------------|
| ID              | ESG-009                                                                   |
| Aspect          | A1. Emissions                                                             |
| KPI             | Waste recycled / reused (tonnes and %)                                    |
| Topics          | Waste recycling, circularity                                              |
| Quantity Type   | Absolute Values / Share                                                   |
| Search Terms    | recycled, reused, recycling rate, waste recovery                          |
| Knowledge/Notes | Measures how much waste is diverted from landfill via recycling or reuse. |

| Field           | Value                                                                                  |
|-----------------|----------------------------------------------------------------------------------------|
| ID              | ESG-010                                                                                |
| Aspect          | A2. Resource Use                                                                       |
| KPI             | Water discharge volumes and quality (m3; pollutant concentrations)                     |
| Topics          | Effluent, water discharge                                                              |
| Quantity Type   | Absolute Values                                                                        |
| Search Terms    | effluent, water discharge, BOD, COD, pollutant concentration                           |
| Knowledge/Notes | Covers treated wastewater volumes and pollutant metrics like BOD/COD where applicable. |

## Additional Environmental Indicators

| Field                  | Value                                                                                             |
|------------------------|---------------------------------------------------------------------------------------------------|
| <b>ID</b>              | ESG-011                                                                                           |
| <b>Aspect</b>          | A1. Emissions                                                                                     |
| <b>KPI</b>             | Air pollutant emissions (NOx, SOx, PM) — totals and intensity                                     |
| <b>Topics</b>          | NOx, SOx, PM                                                                                      |
| <b>Quantity Type</b>   | Absolute Values                                                                                   |
| <b>Search Terms</b>    | NOx, SOx, particulate matter, PM2.5, air emissions                                                |
| <b>Knowledge/Notes</b> | Air pollutant emissions commonly reported by industrial sectors; units depend on pollutant (kg or |

| Field                  | Value                                                                                               |
|------------------------|-----------------------------------------------------------------------------------------------------|
| <b>ID</b>              | ESG-012                                                                                             |
| <b>Aspect</b>          | A3. Biodiversity & Land Use                                                                         |
| <b>KPI</b>             | Land disturbed / rehabilitated (hectares)                                                           |

## Social Responsibility

Our people are our greatest asset. We foster an inclusive, safe, and supportive workplace while contributing positively to the communities where we operate. Our social performance metrics track workforce diversity, health and safety, training and development, and community engagement.

## Marketing and Brand Performance

Our digital marketing initiatives delivered exceptional results in 2024. Website traffic increased by 34% year-over-year, reaching 2.8 million unique visitors monthly. Social media engagement grew by 47%, with follower growth accelerating across all major platforms. Email marketing campaigns achieved an average open rate of 28.5%, significantly exceeding industry benchmarks of 21%. Customer acquisition cost decreased from \$87 to \$62, while customer lifetime value increased to \$1,450. Brand awareness surveys indicated a 15 percentage point improvement in aided recall across target demographics, positioning us as a top-3 brand in our category.

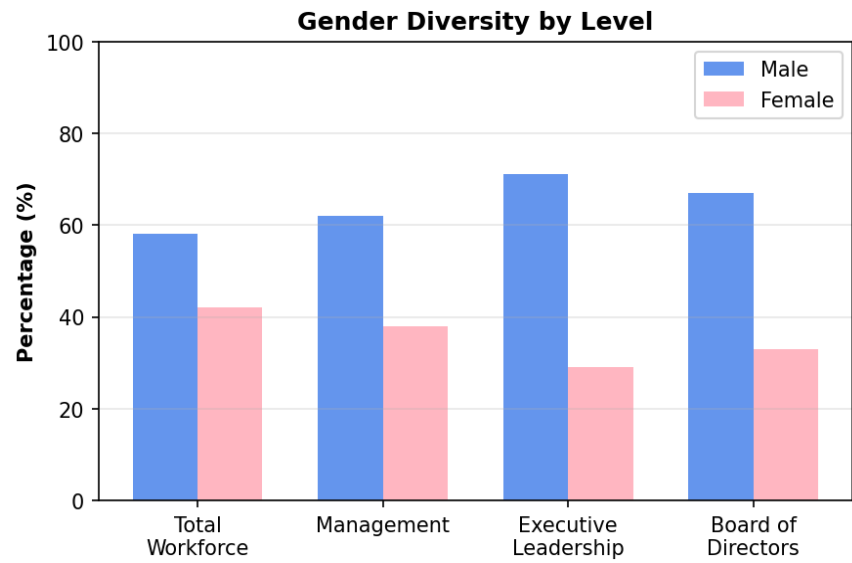

## Workforce Composition and Diversity
